

OrthoForge Launches Their Next Generation Website

Grand Rapids, MI – December 16, 2016 – OrthoForge, an early stage medical device company concentrating in osteogenesis, today announced that it has launched its new website, www.orthoforge.com

"We are extremely excited about the direction of our company to date, and being able to re-launch our website allows us to better convey our mission to all healthcare stakeholders, worldwide", said Jim Fries, CEO of OrthoForge.

Mr. Fries also added, "The importance of being able to share the next generation therapeutic device in bone healing has become our daily mission. We are dedicated to improving the patient experience and ultimately the clinical outcome".

About OrthoForge

OrthoForge is a privately held medical device company focused on providing solutions to clinicians worldwide in the areas of osteogenesis and bone healing through the use of their proprietary product platform. The company will be headquartered in Philadelphia, Pennsylvania.
